E-mail address			
Signature (optional)			

¹ For a greater number of inventors, please use an additional form.

Observations:

- > In Switzerland and in Europe, the inventor or inventors have the right to be named in the patent; in the USA, for example, this is compulsory. Thus, omitting one or several inventors can have legal consequences, including the risk of seeing the patent declared null in certain States.
- > Only the inventors who have actually participated to the invention claimed in the patent should be named; anyone who has only supervised a development without actively contributing thereto or an operative who has acted according to the inventive concepts of another without active contribution, is not considered an inventor.
- > Only natural persons can be named as inventors.
- > The inventors can renounce the right to being named.
- > The order in which the names are listed has no influence on the conferred rights; the name of the first inventor mentioned may however appear more visibly on certain publications.
- > The rights conferred by the patent belong to the applicant and not to the inventors.
- > Signatures can be required on certain documents up to 30-36 months after the application has been filed in the case of subsequent filings in other countries for the invention in question. The applicant should thus ensure that the required signatures can still be obtained from the inventors.

The undersigned confirms the accuracy of the above information. Specifically he confirms having no knowledge of any other inventors having participated in the invention. Moreover he commits to communicate without delay any change of address of the above mentioned inventors.

Place and date: _____

Signature of the inventors: _____
